

# WIPHAWAN PIAPRAMONG

Front-End Developer

## ABOUT ME

I studied in multimedia technology and learned a variety of skills such as coding, editing, and game development. Even though I had not directly learned programming, I was ready to learn, improve, and give it my all.

## EDUCATION

Thai-Nichi institute of Technology  
Multimedia Technology (2020-Present)  
GPA 3.90

Bodindecha Samutprakarn  
Science-Mathematics Program (2017-2019)  
GPA 3.95

## PROJECTS

### Fronte-End

- Have worked on a team project to develop an application about dessert Performs as the project's primary coder. Learn how to install npm, use github, and react.js.
- Practice writing a flower shop website by researching methods and guidelines on YouTube. Use HTML CSS JavaScript to create a website.

### Back-end

- Build a project about a phone shop. In this project, I will create a CRUD database and learn how to use Node.js MongoDB.

### Game Developer

- Create Shimamuko, a 2D pixel RPG game with puzzles and story about a person who becomes stranded on an island, as a group project. This game was made with Unity.
